

Zero Carbon Technological Innovation: Driving Forces and Global Opportunities

10:45-12:00 AM, Monday, December 11th, 2023 @ China Pavilion

Abstract: Under the challenge of global climate change, it is imperative to promote international dialogues between enterprises and organizations in the fields of clean renewable energy and green supply chain. Global experts and business representatives will be invited to discuss the responsibilities, roles, and best practices of the private sector in global climate governance, as well as the driving forces and opportunities for the green transformation of enterprises outside the community of a shared future. The side event will be co-hosted by the Vanke Foundation and C Team.
